

Triangle - Interior Angle

Example:

Sum of the interior angles = 180°

Sum of the interior angles = $40^\circ + 40^\circ + \angle D$

$180^\circ = 80^\circ + \angle D$

$\angle D = 180^\circ - 80^\circ = 100^\circ$

Find the unknown interior angle for each triangle.

$\angle P =$

$\angle F =$

$\angle G =$

$\angle W =$

$\angle U =$

$\angle C =$

$\angle J =$

$\angle Q =$

$\angle C =$
